SWS3011 – DOTA Defense of the Ancients
Lab 2

Shen Jiamin

Lab #2 — Some Tips

- You can use any Ubuntu instance to do this lab.

  - SEEDs VM is recommended.

- Part 1 — You may want to write a script to hack this.

  - What if you try strings like `aaaaaaaa`

- Part 2 — You may want to write a script to hack this.

  - `man openssl-enc`

- Part 3 — When it comes to writing…

  - Be concise!

  - If you are using any links, please shorten them first.

  - You can use some HTML to format your submission.

  - Be Clear!

  - Most importantly, show evidence of doing practical work
